

Nationwide Children's Hospital – Where Champions Begin

Leading the Way in Pediatric Sports Medicine

At Nationwide Children's Hospital, we are at the forefront of pediatric and adolescent sports medicine, dedicated to advancing the health and performance of young athletes through collaborative, multidisciplinary care. Our team includes experts in orthopedics and sports medicine, adaptive sports medicine, athletic training, physical therapy, motion analysis and research science, musculoskeletal radiology and point-of-care ultrasound, sports nutrition, and sports psychology.

We invite you to explore our innovative research, state-of-the-art facilities, and comprehensive programs designed to support the unique needs of young athletes. Join us at the PRiSM Annual Meeting to discover how we are shaping the future of pediatric and adolescent sports medicine.

PRISM2025 Columbus, OH

JANUARY 30 - FEBRUARY 1, 2025

PRISM Mission

The purpose of PRiSM is to lead interdisciplinary research, education and advancement in pediatric and adolescent sports medicine.

Target Audience

The target audience for the PRiSM 12th Annual Meeting includes orthopedic surgeons, athletic trainers, physical therapists, researchers, mid-level providers, radiologists, sports medicine providers, orthotists, rehab engineers, kinesiologists, nutritionists, educators, administrators, and all others involved with the care and treatment of pediatric and adolescent sports medicine patients.

Annual Meeting Objectives

Upon completion of this activity, participants should be able to:

- Discuss the diagnosis & multidisciplinary management of common pediatric and adolescent sports related injuries.
- Establish treatment guidelines and algorithms for working with childhood athletes and their families.
- Examine multiple evidence based approaches to treating pediatric sports concerns.
- Explore clinical approaches to the injured athlete throughout their continuum of care.
- Evaluate effective ways to improve patient care and reduce lifelong sequelae of sports injuries.
- Analyze research for quality, safety and value to the field of pediatric sports medicine.
- Identify and apply appropriate practice changes to optimize patient care.
- Determine which athletes with acute or chronic injuries can safely return to play in their sport.
- Recognize and treat common overuse injuries in children and adolescents.
- Learning how to perform a sports injury or illness history and exam to develop a differential diagnosis
- Understanding the medical care considerations for different groups of athletes, including children and adolescents

Welcome to Columbus!

On behalf of the 2025 Scientific Program Committee, we are thrilled to welcome you to the 12th Annual Meeting! This year's gathering embodies PRiSM's mission by offering abundant opportunities to strengthen existing relationships and forge new connections within our dynamic, multidisciplinary community.

Our committee expertly crafted a program that is rooted in teaching and learning to foster networking, promoting interprofessional collaboration, and celebrating diversity—all in support of advancing pediatric sports medicine research. This work is vital as we strive to bridge the gap between research and clinical practice, ultimately improving health outcomes for the young athletes we serve.

For the first time in PRiSM's history, our scientific program spans 3 full days, reflecting the remarkable growth and innovation within our field. This year's meeting features over 200 original abstracts presented as podium talks, posters, and e-posters, showcasing contributions across a broad spectrum of pediatric sports medicine topics. Over the next few days, you can look forward to 15 engaging scientific research sessions, 12 focused research group meetings, 9 instructional course lectures, 3 interactive workshops, 2 complex case presentations, many exciting research group updates, and a dynamic poster presentation session. A special highlight of the conference is our keynote speaker, Stephanie Kuzydym, who will provide invaluable insights into youth athlete health and safety. Her unique perspective as an investigative reporter exemplifies the spirit of innovation and collaboration that defines PRiSM.

We firmly believe that innovation flourishes when diverse voices and perspectives come together. Over these 3 days, we hope you learn from our presenters, collaborate with colleagues, and build relationships with peers and mentors. We hope this meeting inspires you to share your ideas, expand your perspectives, and contribute to the ongoing advancement of the field. And above all, we hope you feel the warmth, inclusivity, and accessibility of the PRiSM community so that together we can create a brighter, healthier future for young athletes.

Welcome to PRiSM 2025. We're glad you're here!

Joseph Janosky, DrPH & Jonathan Napolitano, MD 2025 Scientific Program Committee Chairs

THURSDAY, JANUARY 3	0, 2025	
7:30-8:30 am		Winter Wellness Walk

5:30-7:00 pm	Kojo Kamau	PRiSM Poster Power Hour

SATURDAY, FEBRUARY 1, 2025				
7:00-7:50 am	Kojo Kamau	Breakfast and Networking Session		
	Robinson AB	Research Interest Group Update: Session 2		
8:00-8:50 am	Robinson AB	Instructional Course Lecture 4: Management of Obligatory Patellar Instability		
	Robinson C	Instructional Course Lecture 5: From Head to Toe: Concussion & Musculoskeletal Injury Risk, Assessment, and Virtual Reality Intervention		
9:00-9:50 am	Robinson AB	Scientific Session 8: Bone Injuries and Conditions In Pediatric Sports Medicine		
	Robinson C	Scientific Session 9: Epidemiology and Public Health		
10:00-10:50 am	Robinson AB	Scientific Session 10: Treatment Techniques and Outcomes II		
	Robinson C	Scientific Session 11: Rehabilitation and Return To Sport II		
11:00-11:50 am	Robinson AB	Instructional Course Lecture 6: Beyond the Injury: Psychological Aspects of Injury and Return to Sport		
	Robinson C	Instructional Course Lecture 7: Are Recreational Sports a Relic of the Past or a Solution for the Future?		
12:00-12:50 pm	Robinson AB	Business Meeting and Award Session Lunch		
1:00-1:50 pm	Robinson AB	Instructional Course Lecture 8: Get Back in The Game! Optimizing Return to Sport Decision Making		
1:00-2:50 pm	Robinson C	Workshop 3: To Operate or Not to Operate: Common Pediatric Sports Injuries Debated		
2:00-2:50 pm	Robinson AB	Instructional Course Lecture 9: A Full Circle Approach to Overuse Injuries Associated with the Windmill Pitch in Adolescent Softball Players		
3:00-3:50 pm	Robinson AB	Scientific Session 12: Concussion and Head Injuries in Pediatric Sports Medicine		
	Robinson C	Scientific Session 13: The Female Athlete		
4:00-4:50 pm	Robinson AB	Scientific Session 14: Diagnostic Imagining in Pediatric Sports Medicine		
	Robinson C	Scientific Session 15: Social Issues in Pediatric Sports Medicine		

Continuing Education (CE) Language

PEDIATRIC RESEARCH IN SPORTS MEDICINE SOCIETY 2025 - 12^{TH} annual meeting

Live: January 30, 2025 - February 1, 2025 - Columbus, OH Enduring: February 15, 2025 - February 15, 2026 - Online

JOINT ACCREDITATION STATEMENT

In support of improving patient care, this activity has been planned and implemented by Amedco LLC and Pediatric Research in Sports Medicine (PRISM). Amedco LLC is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Amedco Joint Accreditation #4008163.

Professions in scope for this activity are listed below.

PHYSICIANS

Amedco LLC designates this **live activity** for a maximum of **15.25** AMA PRA Category 1 CreditsTM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Amedco LLC designates this **enduring material** for a maximum of **23.00** AMA PRA Category 1 CreditsTM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

NURSES

Amedco LLC designates this activity for a maximum of 15.25 **live activity/ 23.00 enduring material** ANCC contact hours.

ATHLETIC TRAINERS

Amedco (BOC AP#: 4008163) is approved by the Board of Certification, Inc. to provide continuing education to Athletic Trainers (ATs). This program is eligible for a maximum of 15.25 live activity / 23.00 enduring material Category A hours/CEUs. ATs should claim only those hours actually spent in the educational program.

NEW JERSEY STATE BOARD OF PHYSICAL THERAPY EXAMINERS (NJ PT)

Live: The New Jersey State Board of Physical Therapy Examiners (NJ PT) has approved the following course for continuing education credit: 2025 - 12th Annual Meeting on January 30, 2025 - February 1, 2025 in Columbus, OH for up to 15.25 General Hours.

Approval #: 2411-38

Enduring: The New Jersey State Board of Physical Therapy Examiners (NJ PT) has approved the following course for continuing education credit: 2025 - 12th Annual Meeting on February 15, 2025 – February 15, 2026 held online for up to 23.00 General Hours.

Approval #: 2411-38

OHIO OCCUPATIONAL THERAPY, PHYSICAL THERAPY AND ATHLETIC TRAINERS BOARD (OTPTAT) LIVE ONLY

The Ohio Physical Therapy Association (OPTA) has approved the following course for continuing education in Ohio: 2025 PRiSM 12th Annual Meeting has been approved for up to 15.25 CEUs. Course Approval Number: 25S0328.

PENNSYLVANIA STATE BOARD OF PHYSICAL THERAPY (PA PT)

This activity has been submitted for review.

TEXAS PHYSICAL THERAPY ASSOCIATION (TX PT)

Live: PRISM 12th Annual Meeting has been approved for **15.25** continuing competence unit(s)(CCUs). Course Approval Number: 79750TX.

Enduring: PRISM 12th Annual Meeting has been approved for **23.00** continuing competence unit(s)(CCUs). Course Approval Number: 79752TX.

States with reciprocity with Texas Physical Therapy Association: AL, AK, AZ, CT, DE, GA, HI, ID, IN, IA, KS, KY, LA, ME, MA, MI, MN, MO, MS, NE, NH, NC, ND, OR, RI, SC, SD, TN, UT, VT, VA, WA, WI, WY

CALIFORNIA BOARD OF PHYSICAL THERAPY (CA PT)

This course has been Approved by CERS, an Approval Agency for the California Board of Physical Therapy.

Acknowledgements

The Pediatric Research in Sports Medicine Society would like to thank the following organizations for their generous support of PRiSM and the 12th Annual Meeting.

When your child needs a hospital, everything matters.

Sports Medicine & Performance Center

Children's Orthopedic and Sports Medicine Center

Exhibitors

We would like to thank all of the companies for exhibiting at PRiSM's 12th Annual Meeting. Exhibits are located in the Kojo Kamau Pre-function area. These companies and organizations help to make our Annual Meeting possible, and we encourage you to visit the exhibits.

Apex Health Group Arthrex, Inc. Enovis Smith + Nephew VALD Group

Announcements

CELL PHONES

As a courtesy to others, please silence your mobile devices during all presentations.

INTERNET ACCESS

Complimentary internet is available throughout the conference space and hotel.

MEALS

Breakfast and lunch will be provided on Friday and Saturday.

WELCOME RECEPTION - THURSDAY, JANUARY 30

The Welcome Reception will take place in the Kojo Kamau Ballroom.

POSTER POWER HOUR AND RECEPTION - FRIDAY, JANUARY 26

The Poster Power Hour and Reception will be held in the Kojo Kamau Ballroom on the 4th floor. Participants will have a chance to speak with colleagues, exhibitors and poster presenters.

REGISTRATION DESK HOURS -ROBINSON PREFUNCTION AREA

Wednesday, January 29 5:00–7:00pm Thursday, January 30 6:30am–5:00pm Friday, January 31 6:30am–5:00pm Saturday, February 1 6:30am–5:00 pm

Sports Medicine Program

Our large, experienced team of sports medicine experts is focused exclusively on young athletes. We have a deep understanding of how to care for the growing body, enhance a developing athlete's performance and teach them injury prevention strategies for life.

Our Services

- Research-backed care, including specialized research programs for knee anatomy, OCD, and female athletes
- Sideline support and education for 30+ youth teams
- Innovative fast MRI technology that creates 4D images in 10 minutes
- Specialized sports physical therapy
- Motion and force analysis technology

7:30–8:30 AM Wellness Walk

Bundle up and join local PRiSM members for a walk around Columbus to get some fresh air and ready your mind and body for the educational sessions to come!

7:30-11:30 AM

Workshop 1: Pediatric Musculoskeletal Ultrasound

Robinson C

This hands-on ultrasound workshop will focus on providing the fundamental knowledge of MSK ultrasound to both beginners and advanced practitioners looking for help understanding the complex sonoanatomy of the skeletally immature athlete and those desiring to practice more advanced dynamic imaging techniques of the hip. This will be a combination of short instructional lectures and live demonstrations with an emphasis on time spent during the hands-on scanning sessions using real pediatric and adult models.

Objectives:

Understand basic ultrasound physics, describe instrumentation principles, and demonstrate image optimization techniques

Identify normal sonoanatomy of a skeletally immature patient

Perform a complete diagnostic evaluation of the knee and ankle with additional focus on the dynamic exam for hip instability

Drew Duerson, MD; Jacob Jones, MD; Jonathan Napolitano, MD; Pierre D'Hemecourt, MD; Naomi Brown, MD; Andrea Stracciolini, MD

Breakfast and lunch provided for registered participants

9:00-10:00 am

Instructional Course Lecture 1: The Movement Blueprint: Optimizing Youth Development Through Physical Literacy

Robinson AB

As defined by the International Physical Literacy Association, physical literacy is the "motivation, confidence, knowledge, and understanding to value and take responsibility for engagement in physical activities for life." The construct offers a necessary and more holistic, systems-oriented approach to physical activity promotion, recently spurring the world-wide launch of physical literacy development initiatives for youth. Sports medicine professionals are aptly suited, and perhaps responsible, for fostering physical literacy development among youth, particularly among those at highest risk of physical literacy disruption following injury.

During this course, audience members will learn from speakers with expertise in public health, sports medicine clinical practice, research, and community outreach. Attendees will leave equipped with the knowledge and confidence to educate youth and families on the importance of physical literacy development, regardless of sex, ability, sport, and competition level. Recent evidence will be employed to demonstrate the critical need for sports medicine professionals to re-conceptualize care provision for all young patients in order to promote quality movement for life. For clinical application, attendees will be introduced to interdisciplinary strategies for supporting necessary development of physical literacy among youth.

Joseph Janosky, DrPH, MSc, PT, AT; Christy Zwolski, PT, DPT, PhD; Matthew Paponetti, PT, DPT

Robinson AB

10:15-11:15 am Instructional Course Lecture 2: Moving Towards the Future: The Role of

Mocap, Wearables and AI in the Evaluation and Assessment of Young Athletes Robinson AB

Continuing advancements in single camera-based motion capture and wearable sensor technology have put real-time and real-world data acquisition in the hands of clinicians, coaches, and athletes. This instructional course provides a complex overview of various data acquisition methods. These include 2D single and multi-camera apps for smart phones and tablets, three-dimensional marker-based and markerless motion analysis, and a wide variety of wearable sensors, both research-grade and consumerbased. Methods will be reviewed including ease of use, platforms available (cloud, etc.), type of data collected, accuracy and pros/cons across the spectrum of young athlete populations.

Many of the analysis packages within these motion capture tools use artificial intelligence and machine learning applied within computer vision to identify movement patterns. Artificial intelligence is quickly developing into a variety of tools that can be used to improve the efficiency of data collection and analysis. This course aims to review Al integration into movement analysis and function with a particular focus on its ability to aid in developing patient-specific, precision healthcare delivery. This course aims to equip healthcare professionals with the knowledge to distinguish which methodologies are most effective for their practices, ensuring the best possible outcomes, recovery, injury prevention, and long-term health in young athletes. Kirsten Tulchin-Francis. PhD: Nathan Edwards. PhD. TASC-F: Gabriel Alain. PT. DPT. PhD

	Stephanie Kuzydym is a sports enterprise and investigative reporter for The Louisville Courier Journal, which is part of the USA TODAY Network. For the last decade, Kuzydym's reporting largely focused on the health and safety of athletes. In "Safer Sidelines," a four-part series based on several months of reporting, Kuzydym uncovered the many ways high schools, athletic associations and lawmakers have failed to prepare for the worst-case scenario – sudden death in sports. The project included a first-of-its-kind searchable database of U.S. athlete deaths, as well as a survey and expert assessment of athletic emergency action plans for Kentucky high schools.

future collaboration.

1:00-2:50 pm Workshop 2: The Evidence Regarding Spondylolysis Diagnosis, Imaging, Management, and Rehabilitation

Robinson AB

Lumbar spondylolysis is the most common identifiable cause of low back pain in youth athletes, affecting 14-30% of symptomatic athletes. Spondylolysis management is variable, making it a confusing and difficult condition to treat. What imaging studies should I order? Should the athlete be braced? When should rehab begin? Can therapy cause a spondylolisthesis if it is too aggressive? Is it safe to do lumbar extension? When is it safe to return to sport? Why does the management of this condition vary so dramatically? How do you even pronounce spondylolysis? Attendees will leave this session with answers to all these questions and a good understanding of spondylolysis in the youth athlete. This session will provide an in-depth discussion on the diagnosis, management, and rehabilitation of spondylolysis in the youth athlete. We will discuss the value of patient history, clinical tests, and diagnostic imaging in establishing this diagnosis. The speakers will describe the underlying reasoning behind the different types of medical management and discuss the evidence supporting each. Finally, this session will provide rehabilitation recommendations to return your youth athlete safely and efficiently to sport.

7:00-7:50 am **Breakfast and Networking Session** Kojo Kamau 7:00-7:50 am Robinson AB Research Interest Group Update: Session 2 Female Athlete; Ultrasound; Injury Prevention; Sports Specialization; Concussion; Elbow; and Knee Multi Ligament 8:00-8:50 am Instructional Course Lecture 4: Management of Obligatory Patellar Instability Robinson AB This instructional course offers an in-depth examination of a distinctive pediatric knee disorder characterized by obligate lateral patellar instability. Course participants will gain a thorough understanding of the preoperative assessment, encompassing both physical examinations and radiographic evaluations essential for diagnosing and treating this condition. The course will also address associated medical disorders and comorbidities that often accompany this knee disorder, building a framework to provide a holistic view to the patient's health status. We will discuss the intricacy of surgical reconstruction techniques required to address obligatory lateral patellar instability, highlighting the steps necessary to achieve optimal alignment and function. Additionally, we will outline the preoperative and postoperative physical therapy protocols that are critical for patient recovery and long-term success. These protocols are designed to enhance surgical outcomes and ensure a smooth rehabilitation process. Lastly, this course will emphasize the importance of orthopedic psychology, underscoring the necessity of a multidisciplinary approach. By integrating psychological support into the treatment plan, we aim to address the emotional and psychological challenges faced by patients and their families. This comprehensive approach is essential for achieving the best possible outcomes in managing obligate lateral patellar instability in the pediatric population. Kevin E. Klingele, MD; Daniel J Karam, PT, DPT, SCS; Heather M. Richard, PsyD 8:00-8:50 am Instructional Course Lecture 5: From Head to Toe: Concussion & Musculoskeletal Injury Risk, Assessment, and Virtual Reality Intervention Robinson C A greater risk of musculoskeletal injury with concussion history or following acute concussion has been documented previously among adolescent athletes. While specific risk factors and mechanisms underlying this risk are multifaceted and complex, evidence suggests that persistent neuromuscular control deficits after concussion may be associated with risk of post-concussion subsequent injury risk. This ICL aims to summarize what is known about this specific injury sequalae in adolescent athletes with concussion and intervention strategies. The presentation will summarize the literature reporting the epidemiology of concussion and subsequent injury risk in adolescent athletes, discuss the known risk factors, identify current rehabilitation strategies and neurocognitive training tasks, and importantly, challenge future directions and accessible strategies to target the window of vulnerability post-concussion for future injury in adolescent athletes. 11:00-11:50 am	Instructional Course Lecture 6: Beyond the Injury: Psychological Aspects of Injury and Return to Sport	Robinson AB
	This course is designed to address the full spectrum of psychological impacts of injury in youth athletes. This includes the psychosocial risk factors for injury, potential emotional responses to the injury itself, and implications for surgical outcomes and return to sports. A panel of faculty from two institutions with multidisciplinary teams designed to support mental health in recovery will discuss practical applications for providers across disciplines and settings, including universal practices to optimize wellbeing, supporting athletes throughout the rehabilitation process, recognizing signs of depression, anxiety, or post-traumatic stress, and facilitating appropriate referrals when indicated. Mary Daley, MD; Melissa Christino, MD; Matthew Milewski, MD; Christopher Renjilian, MD; Jamie Shoop, PhD	
11:00-11:50 am	Instructional Course Lecture 7: Are Recreational Sports a Relic of the Past or a Solution for the Future? Children's participation in sport is a critical component to their physical and social development and as such, efforts should be made to provide all children with the opportunity to play. In recent years, there has been an observed shift in the focus of youth sports from that of participation for the health benefits of physical activity and fun to that of winning and competing. As a result, there has been a rise in club sports offerings and a subsequent reduction in recreational sports opportunities. This change presents unique challenges to children's access to sport and may not adequately support their overall physical, social, and emotional development. This course will discuss the benefits and barriers to increasing recreational sport opportunities using the Social Ecological Model as a framework. Utilizing an interactive experience with key sports organization stakeholders, solutions will be discussed and debated. Finally, attendees will be provided with a blueprint for successful implementation of a recreational sports program. Jason Targoff; Nick Garcia; Gregory Knell, PhD, MS; Kevin Latz, MD, MBA; Joseph Janosky, DrPH; Lauren Butler, DPT; Sophia Ulman, PhD	Robinson C

Business Meeting and Award Session Lunch 12:00-12:50 pm

Robinson AB

1:00–1:50 pm Instructional Course Lecture 8: Get Back in The Game! Optimizing Return to Sport Decision Making

Robinson AB

This course will focus on the full spectrum of return to sport (RTS) decision making in young athletes. It will review current best evidence on tools often used to help return young athletes to sports after lower extremity injury. Next, it will discuss future directions with RTS decision making, such as the integration of optimized objective movement analysis and the use of biopsychosocial patient reported outcome measures into the RTS decision. Finally, this course will discuss how to leverage these tools to improve outcomes after RTS, specifically with an increase in physical activity and a reduction of subsequent injury.

Mark V. Paterno PT, PhD, MBA, SCS, ATC; Christin Zwolski PT, PhD, OCS; Laura C. Schmitt PT, PhD

1:00-2:50 pm

Workshop 3: To Operate or Not to Operate: Common Pediatric Sports Injuries Debated

Robinson C

A true engaging debate between pediatrics sports medicine providers when presented with a controversial clinical case. Each presenter will have 8 minutes to present recent literature and their opinion on the case followed by a rebuttal for each person during the debate. Audience participation will include interactive questions for each participants as well as an opportunity to vote on debate winner. Conditions to be reviewed will include a first time patella dislocation in a skeletally immature patient without an osteochondral fracture, a pre-pubescent ACL injury without a meniscochondral injury, a first time shoulder dislocation without bone loss, and a minimally displaced elbow injury in an elite athlete. Moderators will ensure that discussion allows for education opportunities to all professions treating musculoskeletal conditions/injuries.

Cliff Willimon, MD; Crystal Perkins, MD; Kevin Shea, MD; Ted Ganley, MD; Jeff Nepple, MD; Andy Pennock, MD

2:00-2:50 pm

Instructional Course Lecture 9: A Full Circle Approach to Overuse Injuries Associated with the Windmill Pitch in Adolescent Softball Players

Robinson AB

Fastpitch softball is a popular sport, and athletes, particularly pitchers, are at high risk for overuse injury. Softball-related injury rates are low; however, the prevalence of overuse injuries is high, particularly at the high school and collegiate levels. Various intrinsic and extrinsic risk factors, both modifiable and non-modifiable, contribute to injury risk and include factors such as workload, fatigue, pitch counts, and biomechanical pitching errors. This course will introduce a model for overuse injury causality that can be applied in patient history assessment, clinical examination, and injury management. A holistic approach to managing workload, assessing biomechanics throughout the pitching motion, addressing common flaws, and implementing training techniques to enhance pitching will be discussed.

317	CAN ARTIFICIAL INTELLIGENCE BE USED TO CREATE ORTHOPAEDIC RESEARCH IDEAS ABOUT PEDIATRIC PATELLOFEMORAL INSTABILITY?	Sofia Hidalgo Perea (Hospital for Special Surgery); Claire Parker (Stony Brook University); James Barsi (Stony Brook University)
318	EFFICACY OF OBJECTIVE OCULOMOTOR TRACKING TO AID RETURN-TO-PLAY (RTP) DECISIONS IN PEDIATRIC CONCUSSION PATIENTS	Joseph Marshall (SPARCC); Luke Maes (SPARCC); Brett Dusenberry (SPARCC); Jon Minor (SPARCC); Leslie Streeter (SPARCC); Leila Samsam (SPARCC); Jaden Bailey (SPARCC); Cindy Ong (SPARCC); James Dill (SPARCC); Anthony Gross (SPARCC); Mo Mortazavi (SPARCC); Amal Anilkumar (SPARCC)
319	OUTCOMES OF ARTHROSCOPIC REPAIR OF GLENOID BONE DEFECTS IN ADOLESCENT ANTERIOR SHOULDER INSTABILITY	Emily Niu (Children's National Medical Center); Andrew Fealy (Children's National Medical Center); Jonathan Zember (Children's National Medical Center)
320	WHICH NEIGHBORHOOD-LEVEL METRIC IS MOST APPROPRIATE IN PEDIATRIC ORTHO- PAEDIC HEALTH EQUITY RESEARCH?	Bryce Maxwell (Ann & Robert H. Lurie Children's Hospital of Chicago); Elizabeth Merritt (Ann & Robert H. Lurie Children's Hospital of Chicago); Sam Rosenberg (Ann & Robert H. Lurie Children's Hospital of Chicago); Michael Navarro (Ann & Robert H. Lurie Children's Hospital of Chicago); Emma Raffman (Ann & Robert H. Lurie Children's Hospital of Chicago); Neeraj Patel (Ann & Robert H. Lurie Children's Hospital of Chicago)
321	INCREASED BMI IS ASSOCIATED WITH INCREASED FAILURE AND DECREASED RETURN TO SPORT FOLLOWING MENISCUS REPAIR IN THE PEDIATRIC POPULATION	Kristen Reikersdorfer (Harvard Medical School); Serafina Zotter (Massachusetts General Hospital); Nikolaos Paschos (Massachusetts General Hospital)
322	HOW DO SOCIAL DETERMINANTS OF HEALTH RELATE TO TIME TO TREATMENT AND IMAGING?	Casey Kuka (The Children's Hospital of Philadelphia); Brendan Williams (Children's Hospital of Philadelphia & University of Pennsylvania); Neeraj Patel (Ann & Robert H. Lurie Children's Hospital of Chicago); Sulagna Sarkar (The Children's Hospital of Philadelphia); Elliot Greenberg (Children's Hospital of Philadelphia); Bridget Desandis (Children's Hospital of Philadelphia); Caroline Kim (The Children's Hospital of Philadelphia); David Kell (The Children's Hospital of Philadelphia)
323	COST-EFFECTIVENESS OF CARDIOVASCULAR SCREENING FOR PREVENTION OF SUDDEN CARDIAC ARREST IN HIGH SCHOOL ATH- LETES	Abbey Santanello (Northwell)
324	ANTERIOR LIP DISPLACEMENT IS ASSOCIATED WITH UNPLANNED RETURN TO OPERATING ROOM AFTER OPERATIVE MANAGEMENT OF TIBIAL SPINE FRACTURES	Morgan Swanson (Children's Hospital of Philadelphia); Akbar Syed (The Children's Hospital of Philadelphia); Nathan Chaclas (The Children's Hospital of Philadelphia); Theodore Ganley (Children's Hospital of Philadelphia); Casey Kuka (The Children's Hospital of Philadelphia)
325	AQUOTIC IMPROVES SWIM PROFICIENCY AMONG CHILDREN ON THE AUTISM SPEC- TRUM	Erika Kemp (Ohio State University); Melica Nikahd (Ohio State University); Jewel Crasta (Ohio State University)
327	THE EFFECT OF INJURY DEFINITION ON INCI- DENCE RATE IN ADOLESCENT CROSS-COUN- TRY RUNNERS	Jeffery Taylor-Haas (Cincinnati Children's Hospital Medical Center); Jason Long (Cincinnati Children's Hospital Medical Center); Ashley Moulder (Cincinnati Children's Hospital Medical Center); Mitchell Rauh (San Diego State University)

	ADAPTIVE SPORTS EXPOSURE IMPACTS	Charlotte Wahle (UCLA School of Medicine); Rachel Thompson (Univer-
401	PROVIDER COMFORT IN TREATING PATIENTS WITH DISABILITIES	sity of California, Los Angeles); Nora Galoustian (University of California, Los Angeles); Nicole Newman-Hung (University of California, Los Angeles); Alexander Rueda (University of California, Los Angeles); Christina Im (University of California, Los Angeles); Eghosa Edogun (University of California, Los Angeles); Charlotte Poplawski (University of California, Los Angeles)
402	WHAT DO KIDS WANT? A QUALITATIVE EXPLORATION OF CHILDREN'S EXERCISE PREFERENCES	Gina Gugliotta (Cincinnati Children's Hospital Medical Center); Christin Zwolski (Cincinnati Children's Hospital Medical Center); Laine Anthony (University of Cincinnati)
403	INCIDENCE OF TIBIAL TUBERCLE FRACTURES IN PATIENTS WITH AND WITHOUT OS- GOOD-SCHLATTER DISEASE	Aristides Cruz Jr. (Brown University); James Albright (Brown University); Tucker Callanan (Rhode Island Hospital & Brown University); Rigel Hall (Creighton University); Helen Zhang (Brown University); Alan Daniels (Brown University); John Milner (Brown University)
404	NEGATIVE IMPACT OF UNMET NEEDS ON PEDIATRIC ORTHOPEDIC PATIENTS	Justin Jensen (University of Texas Austin); K. Wagner III (University of Texas Austin); Landon Ashby (University of Texas Austin); David Ring (University of Texas Austin); Matthew Ellington (University of Texas Austin)
405	USING PATIENT-SPECIFIC KNEE MODELS TO QUANTIFY KNEE MECHANICS DIFFERENCES BETWEEN ADOLESCENTS WITH AND WITH- OUT PATELLOFEMORAL INSTABILITY DURING A LUNGE TASK	Annagh Macie (University of Ottawa); Allison Clouthier (University of Ottawa); Daniel Benoit (University of Ottawa); Sasha Carsen (Children's Hospital of Eastern Ontario); Alicia Kerrigan (Children's Hospital of Eastern Ontario)
406	COMPARISON OF MOVEMENT VARIABILITY FOLLOWING ACL RECONSTRUCTION SURGERY	Eric Dugan (Texas Children's Hospital and Baylor College of Medicine); Sierra Hastings (Texas Children's Hospital); Katelyn Campbell (Texas Children's Hospital)
407	CHARACTERISTICS OF LUMBAR PARS INTER- ARTICULARIS AND PEDICLE STRESS INJURIES BY SPORT IN 902 PEDIATRIC AND ADOLES- CENT ATHLETES: A RETROSPECTIVE STUDY	William Meehan III (Boston Children's Hospital); Daniel Hedequist (Boston Children's Hospital); Cynthia Stein (Boston Children's Hospital); Michael O'Brien (Boston Children's Hospital); Lyle Micheli (Boston Children's Hospital); Michael Beasley (Children's Hospital of Philadelphia); Danielle Hunt (Boston Children's Hospital); Sarah Willwerth (Brown University); John Kriz (Vanderbilt University); Peter Kriz (Boston Children's Hospital)
408	A QUANTITATIVE ASSESSMENT OF PAIN AND OPIOID CONSUMPTION IN THE WEEK FOLLOWING ACL RECONSTRUCTION FOR ADOLESCENT PATIENTS	Theodore Ganley (Children's Hospital of Philadelphia); Divya Talwar (Children's Hospital of Philadelphia); Vineet Desai (Children's Hospital of Philadelphia); Richa Gandhi (The Children's Hospital of Philadelphia); Morgan Swanson (Children's Hospital of Philadelphia); Brendan Williams (Children's Hospital of Philadelphia & University of Pennsylvania); Christopher DeFrancesco (The Children's Hospital of Philadelphia)
409	LOCATION ON RECOVERY	Cati Kral (Children's Mercy); Brian Harvey (Children's Mercy Hospital); Kevin Latz (Children's Mercy Hospital); Shannon Margherio (Children's Mercy); Joshua Cummings (Children's Mercy Hospital); Ellie Helton (Children's Mercy Hospital)
410	THE EFFECTS OF INJURY ON PAIN INTERFER- ENCE AND PEER RELATIONSHIPS DURING A HIGH SCHOOL FEMALE FLAG FOOTBALL SEASON	Hannah Rossing (Children's Hospital Colorado); Madison Brna (University of North Carolina - Chapel Hill); Savannah Troyer (Children's Hospital Colorado); Claire Giachino (Children's Hospital Colorado); Curtis VandenBerg (University of Southern California); David Howell (Children's Hospital Colorado); Aubrey Armento (Children's Hospital Colorado); Jay Albright (Children's Hospital Colorado)
411	CAN IN VIVO ARTHROSCOPIC PEDIATRIC RADIAL MENISCUS TEAR REPAIRS MATCH THE BIOMECHANICAL PERFORMANCE OF LABORATORY MENISCUS REPAIRS?	Kevin Shea (Stanford University); Andrew Huang (Stanford University); Austin Stoner (Stanford University); Alan Anaya Gallegos (Stanford University); Nneoma Duru (Stanford University); Amin Alayleh (Stanford University); Calvin Chan (Stanford University); Neha Boinpally (Stanford University); Bryan Khoo (Stanford University); Matthew Schmitz (United States Airforce); Marc Tompkins (University of Minnesota); Yi-Meng Yen (Boston Children's Hospital); Theodore Ganley (Children's Hospital of Philadelphia); Molly Meadows (Stanford University); Charles Chan (Stanford University); Grady Hofmann (Stanford University)
412	INJURY PATTERNS IN YOUTH POLE VAULTING	Martha Kebeh (Children's Hospital of Philadelphia & University of Pennsylvania); Theodore Ganley (Children's Hospital of Philadelphia); Divya Talwar (Children's Hospital of Philadelphia); Kevin Landrum (Children's Hospital of Philadelphia)

413	PHYSEAL-SPARING ITB ACL RECONSTRUC- TION: CAN WE REDUCE ITB GRAFT LENGTH AND SYMPTOMATIC VASTUS MUSCLE HERNI- ATION?	Nneoma Duru (Stanford University); Austin Stoner (Stanford University); Amin Alayleh (Stanford University); Dane Lind (University of Texas Southwestern) Cassidy Schultz (Scottish Rite for Children); Nicole Pham (Stanford University); Henry Ellis (Scottish Rite for Children); Yi-Meng Yen (Boston Children's Hospital); Marc Tompkins (University of Minnesota); Matthew Schmitz (United States Airforce) Theodore Ganley (Children's Hospital of Philadelphia); Molly Meadows (Stanford University); Charles Chan (Stanford University); Kevin Shea (Stanford University)
415	THE TRIAGING OF PEDIATRIC SPORTS SURGERIES – WHAT IS URGENT AND WHAT IS "ELECTIVE"?	Sasha Carsen (Children's Hospital of Eastern Ontario); Aristides Cruz Jr. (Brown University); Henry Ellis (Scottish Rite for Children); Curtis Vanden-Berg (University of Southern California); Stephanie Mayer (Children's Hospital Colorado); Emily Niu (Children's National Medical Center); Jennifer Beck (UCLA); Shalin Shah (Children's Hospital of Eastern Ontario)
416	THE ASSOCIATION OF WEIGHT LOSS AND EATING DISORDER DIAGNOSES IN ADOLES-CENTS DIAGNOSED WITH STRESS FRACTURES	Audrey Potts (Mayo Clinic); David Soma (Mayo Clinic); Leslie Sim (Mayo Clinic); Jocelyn Lebow (Mayo Clinic); Marcie Billings (Mayo Clinic); Roland Hentz (Mayo Clinic); Joel Hickman (Mayo Clinic)
417	RETURN TO SPORTS TESTING USING 3D MOTION ANALYSIS AFTER ANKLE FRACTURE	Jeremy Bauer (Oregon Health and Sciences University); Sean Waldron (Shriner's Hospital for Children - Philadelphia); Ross Chafetz (Shriners Hospital for Children, Philadelphia); Patrick Do (Shriners Hospital for Children); Jacob Carl (Shriners Hospital for Children)
418	EPIDEMIOLOGY OF PEDIATRIC SKATE- BOARDING INJURIES PRESENTING TO THE EMERGENCY DEPARTMENTS: SEX- AND AGE- BASED PATTERNS	Celina de Borja (University of California San Francisco); Dai Sugimoto (Waseda University); Maria Antonia Wong (Icahn School of Medicine at Mount Sinai)
419	RISK FACTORS FOR ELBOW STIFFNESS IN OSTEOCHONDRITIS DISSECANS OF THE CAPITELLUM: DOES SURGERY IMPROVE RANGE OF MOTION?	Koya Osada (Boston Children's Hospital); Donald Bae (Boston Childrens Hospital); Patricia Miller (Boston Children's Hospital)
420	COMPLEXITIES OF ADOLESCENT BACK PAIN IN ORTHOPEDICS AND SPORTS MEDICINE	Kirsten Tulchin-Francis (Nationwide Children's Hospital); Heather Richard (Nationwide Children's Hospital); Mutaleeb Shobode (Nationwide Children's Hospital); Bahja Muse (Nationwide Children's Hospital); Gerrit Franko (Nationwide Children's Hospital); Melissa Owusu-Ansah (Nationwide Children's Hospital); Chen Li (Nationwide Children's Hospital); Daryn Strub (Nationwide Children's Hospital); Adam Mansour (Nationwide Children's Hospital); Allen Kadado (Nationwide Children's Hospital)
421	PERFORMANCE OF ARTIFICIAL INTELLIGENCE IN ADDRESSING QUESTIONS REGARDING MANAGEMENT OF PEDIATRIC SUPRACONDYLAR HUMERUS FRACTURES	Aristides Cruz Jr. (Brown University); Craig Eberson (Brown University); Jonathan Schiller (Brown University); Alexandre Boulos (Brown University); Adam Nasreddine (Boston Childrens Hospital); Jeffrey Hestenburg (Boston Childrens Hospital); Ashley Knebel (Brown University); Phillip Schmitt (Boston Children's Hospital); Matthew Quinn (Brown University); John Milner (Brown University)
422	EPIDEMIOLOGY OF SUBJECTIVE SLEEP DISTURBANCE AFTER PEDIATRIC AND ADOLESCENT CONCUSSION	James Wilkes (Children's Hospital of Philadelphia); Daniele Fedonni (Children's Hospital of Philadelphia); Christina Master (Children's Hospital of Philadelphia & University of Pennsylvania); Kristy Arbogast (Children's Hospital of Philadelphia & University of Pennsylvania)
423	THE EFFECT OF EARLY ACCESS ON SPORTS-RELATED CONCUSSIONS IN YOUTH CLUB SPORTS	Logan Weis (Caze Concussion Institute); Dolce Martin-Moreno (UC San Diego); Heather Bouchard (University of Nebraska-Lincoln); Todd Caze II (Caze Concussion Institute); Desi Vasquez (Texas A&M International University)
424	BIOMECHANICAL ASYMMETRIES IN HIGH- SCHOOL CROSS-COUNTRY RUNNERS	Shane Miller (Scottish Rite for Children); Henry Ellis (Scottish Rite for Children); Jacob Jones (Scottish Rite for Children); Jane Chung (Scottish Rite for Children); Jessica Penshorn (Scottish Rite for Children); Ashley Erdman (Scottish Rite for Children); Sophia Ulman (Scottish Rite for Children); Alex Loewen (Scottish Rite for Children)
425	BEYOND THE INJURY: HOW PREOPERATIVE MOOD DISORDERS AFFECT POSTOPERATIVE OUTCOMES IN ADOLESCENT ATHLETES	Emily Moya (Stanford University); Jude Alawa (Stanford University); Stewart Bryant (Stanford University); Aneysis Gonzalez-Suarez (Stanford University); Molly Meadows (Stanford University); Kevin Shea (Stanford University)

426	THE RELIABILITY OF A TWO-PLANE QUALITATIVE ASSESSMENT TOOL FOR A SINGLE LEG HOP TASK AMONGST MULTIDISCIPLANARY SPORTS MEDICINE PRACTITIONERS	Lauren Butler (Florida International University); Ashley Erdman (Scottish Rite for Children); Alexa Martinez (Nicklaus Children's Hospital) ; Dai Sugimoto (Waseda University); Joseph Janosky (Lasell University); Sophia Ulman (Scottish Rite for Children)
427	THE RELATIONSHIP BETWEEN PHYSICAL ACTIVITY LEVEL AND PSYCHOLOGICAL READINESS TO RETURN TO SPORT AFTER ANTERIOR CRUCIATE LIGAMENT RECONSTRUCTION	Lauren Butler (Florida International University); Sophia Ulman (Scottish Rite for Children); Dylan Roman (Connecticut Childrens); Cody Walker (Arkansas Children's Hospital); Taylor Douthit (Children's Health Andrews Institute); Christopher Kuenze (University of Virginia); Shelby Baez (University of North Carolina - Chapel Hill); ACL Reconstruction Rehabilitation Outcomes Workgroup (University of Virginia)
428	CLINICAL UTILITY OF OBJECTIVE OCULOMOTOR TRACKING IN PEDIATRIC MTBI PATIENTS IN RETURN TO LEARN (RTL) DECISION MAKING	Amal Anilkumar (SPARCC); Luke Maes (SPARCC); Mo Mortazavi (SPARCC); Anthony Gross (SPARCC); James Dill (SPARCC); Cindy Ong (SPARCC); Jaden Bailey (SPARCC); Leila Samsam (SPARCC); Leslie Streeter (SPARCC); Jon Minor (SPARCC); Brett Dusenberry (SPARCC); Joseph Marshall (SPARCC)
429	CORRELATIVE ANALYSIS BETWEEN VALI- DATED CONCUSSION CLINICAL PROFILES SCREENING (CP SCREEN) AND OBJECTIVE OCULOMOTOR TRACKING SUMMARY SCORE	Mo Mortazavi (SPARCC); Anthony Gross (SPARCC); James Dill (SPARCC); Cindy Ong (SPARCC); Jaden Bailey (SPARCC); Leila Samsam (SPARCC); Leslie Streeter (SPARCC); Jon Minor (SPARCC); Brett Dusenberry (SPARCC); Luke Maes (SPARCC); Amal Anilkumar (SPARCC); Joseph Marshall (SPARCC)
430	COMPARING GRIT SCORES BETWEEN UNIN- JURED FEMALE ADOLESCENT ATHLETES AND FEMALE ADOLESCENT ATHELETES UNDER- GOING ACL RECONSTUCTION	Savannah Troyer (Children's Hospital Colorado); Rachel Meyers (Children's Hospital Colorado); Curtis VandenBerg (University of Southern California); Aubrey Armento (Children's Hospital Colorado); Jay Albright (Children's Hospital Colorado); David Howell (University of Colorado); Madison Brna (University of North Carolina - Chapel Hill); Claire Giachino (Children's Hospital Colorado); Hannah Rossing (Children's Hospital Colorado)
431	THE NATURAL HISTORY OF IMAGING PARAMETERS OF THE KNEE IN PATELLOFEMORAL INSTABILITY PATIENTS THROUGHOUT SKELETAL MATURATION	Nathan Chaclas (The Children's Hospital of Philadelphia); Vandan Patel (The Children's Hospital of Philadelphia); David Kell (The Children's Hospital of Philadelphia); Julianna Lee (The Children's Hospital of Philadelphia); Kevin Orellana (The Children's Hospital of Philadelphia); Theodore Ganley (Children's Hospital of Philadelphia); Jie Nguyen (Children's Hospital of Philadelphia); J.Todd Lawrence (Children's Hospital of Philadelphia & University of Pennsylvania); Brendan Williams (Children's Hospital of Philadelphia & University of Pennsylvania)
432	INJURY AND ILLNESS SURVEILLANCE OF TEAM USA ATHLETES AND THE IMPACT ON MEDAL PERFORMANCE AT THE 2024 GANG- WON YOUTH OLYMPIC GAMES	Ashley Triplett (United States Olympic and Paralympic Committee); Travis Anderson (United States Olympic and Paralympic Committee); Eric Post (United States Olympic and Paralympic Committee); William Adams (United States Olympic and Paralympic Committee); Jeffrey Shilt (Texas Childrens Hospital and Baylor College of Medicine); Eric Dugan (Texas Childrens Hospital and Baylor College of Medicine); Amber Donaldson (United States Olympic and Paralympic Committee); Jonathan Finnoff (United States Olympic and Paralympic Committee); Lea Thomann (United States Olympic and Paralympic Committee); Olivia Samson (United States Olympic and Paralympic Committee); Alexis Gidley (United States Olympic and Paralympic Committee); Francisco Silva (Thomas Jefferson University)
433	VARIATION IN FEMORAL NOTCH MORPHOLOGY IN PEDIATRIC KNEES	Dane Lind (University of Texas Southwestern); Cassidy Schultz (Scottish Rite for Children); Amin Alayleh (Stanford University); Marc Tompkins (University of Minnesota); Kevin Shea (Stanford University); Theodore Ganley (Children's Hospital of Philadelphia); Henry Ellis (Scottish Rite for Children); Yi-Meng Yen (Boston Children's Hospital); Matthew Schmitz (United States Airforce)
434	WHAT IS THE OPTIMAL TREATMENT OF FIXABLE OSTEOCHONDRAL FRACTURES?: A COMPARISON OF METAL AND BIOABSORBABLE FIXATION	Jeffrey Nepple (Washington University); Beltran Torres (Washington University in St Louis) Annmarie Wang (Washington University)

E-Posters

435	COMPARISON OF RETEAR RATES AND ALL- CAUSE REOPERATION RATES IN PEDIATRIC AND ADOLESCENT ACL RECONSTRUCTION USING BONE PATELLAR TENDON AND QUAD- RICEPS TENDON GRAFTS	Kyla Petrie (University of California San Francisco); Elliott Cole (University of California San Francisco); Pardeep Dhillon (University of California San Francisco); Nirav Pandya (University of California San Francisco)
436	SAFE FOR ADOLESCENT RUNNERS? AGE RISK OF INJURIES; MEDICAL CONDITIONS IN A MARATHON – A TWO-YEAR STUDY	Mitchell Rauh (San Diego State University) Michele Weinstein (Marine Corps Marathon); Nicole Molumphy (University of San Diego)
437	SURGICAL TREATMENT OF PEDIATRIC AND ADOLESCENT FIXED AND OBLIGATE PATELLA DISLOCATION	Anthony Dure (George Washington); Emily Niu (Children's National Medical Center)
438	RESULTS OF ALLOGRAFT MEDIAL PA- TELLOFEMORAL LIGAMENT RECONSTRUC- TION IN PEDIATRIC PATIENTS	Javier Gonzalez (Clinica Alemana de Santiago); Maximiliano Espinosa (Clinica Alemana de Santiago); Gonzalo De la fuente (Clinica Alemana de Santiago); Rodrigo Donoso Martinez (Clinica Alemana de Santiago); Hector Cifuentes (Clinica Alemana de Santiago)
439	RETURN TO SPORT FOLLOWING AR- THROSCOPIC DEBRIDEMENT AND DRILLING OF CAPITELLAR OSTEOCHONDRITIS DISSE- CANS IN ADOLESCENT ATHLETES	Daryn Strub (Nationwide Children's Hospital); Matthew Beran (Nationwide Children's Hospital); Austin Gerwig (Nationwide Children's Hospital)
440	PSYCHOLOGICAL AND FUNCTIONAL IM- PROVEMENTS IN ADOLESCENTS AFTER CONSERVATIVE MANAGEMENT OF PATELLAR INSTABILITY	Elliot Greenberg (Children's Hospital of Philadelphia); Brendan Williams (Children's Hospital of Philadelphia & University of Pennsylvania); Naomi Brown (The Children's Hospital of Philadelphia); David Kell (The Children's Hospital of Philadelphia); Bridget Desandis (Children's Hospital of Philadelphia)
